Python, HTML, CSS, D3.js,
Javascript, SQL

EXPERIENCE

TX Labs - UX Design Intern

June 2022 - August 2022 / San Francisco, CA (Remote)

- Designed the interfaces for the first-generation Developer Console in Blockless, a serverless platform that offers infrastructural web services including developers' access to accounts and decentralized deployment, by creating detailed interaction specs and visual assets.

MITRE Corporation - UX Consultant

February 2022 - May 2022 (school-sponsored) / Remote

- Designed and launched Argo, a data marketplace that supports secure confidential data sharing and commercialization with blind learning technology, and allowing early access amongst MITRE's verified users.
- Researched use cases of ML and data sharing with a team of PMs and developers to identify core requirements of protecting sensitive data processing.
- Established a design system, created and iterated brand guidelines that helped execution and implementation.

Bean Tech - AI Product Design Intern

July 2020 - August 2020 / Shanghai, China

- Crafted an AI-powered conversational experience that collects driver feedback through VR interfaces to improve the in-car experience.

EquityMultiple - Product Design Intern

May 2019 - August 2019 / New York, NY

- Refined the web referral program to increase real estate investors' invitation efficacy from 12.6% to 16.9%.
- Researched referral use cases and refined content with focus on beneficial earning and lasting loyalty.
- Conducted usability testing with 10 participants to evaluate the content, design and product scale.
